

PEMBROKE
A PRIORY ACADEMY

15th September 2020

Dear Parents/Carers

We are now two full weeks into the new academic year. It has been wonderful to see so many happy faces as they return to school.

As we all adapt to new systems and routines, I am sure there will be aspects of our processes that we will refine and further develop. It remains important that we receive constructive feedback, so please let us know where you think something can be done better. The government guidance continues to evolve, and so in turn we will review and modify our learning environment accordingly.

Below is some up to date clarity to support parents should your child develop possible symptoms of COVID19.

Symptoms

The main symptoms of coronavirus are:

- a high temperature – this means you feel hot to touch on your chest or back (you do not need to measure your temperature)
- a new, continuous cough – this means coughing a lot, for more than an hour, or 3 or more coughing episodes in 24 hours
- a loss or change to sense of smell or taste – this means they cannot smell or taste anything, or things smell or taste different to normal

Please see on the next page, **Information for parents and carers on suspected COVID-19 (coronavirus) in a child.** This information has been taken from the NHS.uk

As always, stay safe and thank you again for your continued support

With best wishes

Mr Evans & Pembroke Team

Headteacher: Mr S Evans

Information for parents and carers on suspected COVID-19 (coronavirus) in a child

WHEN TO SUSPECT COVID-19 IN YOUR CHILD:

if they develop symptoms of a new continuous cough and/or high temperature and/or a loss of, or change in, normal sense of taste or smell (anosmia)

Do not send your child to school or childcare setting. Inform the setting through absence reporting

If your child develops symptoms at the childcare setting, they will be separated from others, and will **be sent home**

If your child (or anyone in your household) has symptoms they must arrange a test **as soon as possible** and isolate at home for **10 days** from date of onset of symptoms (or until they receive a negative result). Everyone else in the household who does not have symptoms must isolate at home for 14 days (or until the symptomatic household member receives a negative result)

Arrange for a coronavirus test for anyone in your household with symptoms either online via www.nhs.uk/coronavirus or call NHS testing line on 119. The test must be done within **five days** of when symptoms start. Ensure you know who to contact with the results in the school/childcare setting if the results are received outside usual working hours

You will be offered a test at your closest drive-through centre. This is the quickest option. A parent or carer will need to perform the test on children under 12 years old. If you don't drive, you can request a home test kit. **Do not** get a taxi or public transport to the test centre

Result of test (you will receive this by email or text message)

NEGATIVE

Child/staff member can return to setting once well, unless they are a contact of a case, when they will need to complete 14 days self-isolation

If your child is identified as having been in contact with a confirmed case, they will need to self-isolate for 14 days, even if they have had a negative test result. If they develop symptoms, they should isolate for 10 days from onset of symptoms, arrange testing and follow the flowchart above

For medical advice call NHS 111, or in an emergency call 999

POSITIVE

Inform the school or childcare setting as soon as possible even if outside opening hours. The child's close contacts within the school will be advised to self-isolate for 14 days

Ensure the child who has tested positive completes the **10 day** isolation period (from date of onset of symptom)*. Household members without symptoms should complete 14 days isolation

NHS Test & Trace will send you a text or email alert or call you with instructions of how to share details of people with whom you have had close, recent contact and places you have visited

*If the child is a confirmed case they can return to the childcare setting/school after 10 days. If they still have a temperature, diarrhoea or are being sick they should wait until 48 hours after these symptoms stop. If the child does not develop symptoms, but lives in a household with someone who has tested positive, they can return to setting after completing 14 days self-isolation at home
